

Features

- Can be installed to all bath types: Cast Iron, Plastic, Fibreglass, Enameled steel, Concrete.
- Super strong fibreglass components can be shaped to form any suitably shaped bath.
- Can be stood on, due to the reinforcing of the bath and the strength of the components.
- Non-slip strips (clear) are adhered to the step for peace of mind.
- The components are customised and glued, screwed and siliconed in place for a long lasting solution.
- Available in white only.
- Cut out can be left, right or centrally positioned
- Will not rust or discolour.
- Tough "2 pack" paint surface in a brilliant white colour.

Our Guarantee

"We pride ourselves on our courtesy and professionalism. We guarantee that if you are not satisfied with your completed installation and the level of finish, we will meet the cost for a tradesperson of your choice to demolish and re-install the equipment."

The Convert a Tub avoids the following issues for your clients

- Struggling with their current bathing situation.
- High risk of injury to your client.
- The cost of a full bathroom modification.
- Waiting for additional fund shortfall thus increasing the risk.
- Frustration in not being able to access the bath.
- Pains and strains from using the standard bath tub.
- Fear or nervousness whilst bathing.
- The danger of being stuck in the bath after bathing.

Clients that do benefit. Those whom:

- Simply can not afford a full bathroom modification.
- Need something done now while they save up for a full bathroom modification.
- Do not currently have a shower but instead have the shower rose over the bath.
- May be palliative.
- Can not tolerate the disruption of the full bathroom modification.
- Are unable to lift their leg up high enough to use the bath.
- Are not confident standing in the bath while showering.
- Are happy to utilise a bath board and sit in the shower.
- Are happy to use a Myco swivel bather to sit on in the bath.

What are the advantages?

- Less costly than undertaking a complete bathroom renovation. On average, ¼ of the price.
- Far less intrusive than a major bathroom modification. In most cases this can be done in 1 working day.
- Can be used after 2nd day (when glue and silicone has cured).
- Can be used in conjunction with a bath board (with or without back-rest).
- No sharp corners to potentially injure yourself on.
- Still allows a bath pole to be fitted to bath for safe ingress and egress.
- Can also be installed into hip baths.
- Can also be installed into certain spa baths.
